PROFESSIONALISM

ENHANCING HUMAN CAPITAL
INSTITUTIONAL HEALTH

Determined by how well an organization connects what it values with what it does…

IOW, it is not just what we do, but how we do it!

AS STAND ALONE GUIDES
PROFESSIONALISM?

The art of leading oneself…

- A commitment to specific institutional standards
- A personal degree of loyalty to shared objectives
- A shared trust between members of the organization

Professionalism is based on a foundation of Commitment, Loyalty and Trust to a specific set of institutional standards and expectations.

Commitment, Loyalty, and Trust are the enablers that connect our AF Core Values to our mission.
That's not my job.

PROFESSIONALISM

Air Force Leaders

FOR IN OR POST COURSE REFERENCE ONLY – NOT TO BE USED AS STAND ALONE GUIDES
TAKING THE FIRST STEP...

We must start by providing leaders with better tools and more of them

These tools must be deliberately engineered and provided across the institution through a combined continuum of education and experience

- This starts with providing a better understanding of the human phenomenon
- A better understanding of the human phenomenon requires tough habits of thought
PROFESSIONALISM

The art of leading oneself...
Tough Habits

• **Behavior**
  - Authority, Peer Pressure, Power
  - Self Discovery and Tough Habits of Thought
  - Determinism, Uncertainty and Probability
  - Systematic Thinking

• **Perspective Bias**
  - Blind Spots
  - Misinformation
  - Capability Gaps
HOW POWERFUL IS LEADERSHIP AND AUTHORITY IN DETERMINING HUMAN BEHAVIOR?

How might authority affect the process of individual behavior and personal decision making?

Power...Authority...Peer Pressure
SIGNIFICANT RESPONSIBILITY

• Leaders must fully understand the immense responsibility and power they wield when placed in a position of authority

• Used for positive ends, this influence can have significant and vital impact on both individual and institutional behavior
HUMAN BEHAVIOR...

We can trust that people will do what they perceive is in their best interest to do.

Don't mistake this fake smile and professional body language. I'd punch you in the throat if I knew I wouldn't lose my job.
• People want to be part of something bigger than themselves

• Research suggests that humans seek and join groups in order to build identity and belonging

• In order to maintain group membership, individuals must choose on their own to modify their behavior to the group’s standards and expectations

• This “choice” is based on perceptions normally centered on trust, loyalty, and a shared commitment toward the group

• Leaders have the ability to influence those perceptions by enhancing individual’s trust, loyalty, and commitment
Behavior driven by Perceptions

Behavior starts first in the brain as a decision
Our decisions are based on our perceptions
Our perceptions are continually being shaped
This “shaping” can be influenced by others

If we want to affect behavior, we must influence perceptions...

...however, influence requires relationships of trust
THE HUMAN PHENOMENON

• Everyone has a brain…
• Everyone has personal experiences…
• Everyone has their own perspective…
• Everyone has a unique way of thinking…

The development of perspective is uniquely shaped over a lifetime…

…quality leaders shape the perspective of others through organic leadership and self-discovery
Finding the occasional straw of truth awash in a great ocean of confusion and bamboozle requires intelligence, vigilance, dedication, and courage. But if we don’t practice these tough habits of thought, we cannot hope to solve the truly serious problems that face us…and we risk becoming a nation of suckers up for grabs by the next charlatan that comes along.

BRIDGING THE THINKING PARADOX

Determinism

Probability

Uncertainty

FOR IN OR POST COURSE REFERENCE ONLY – NOT TO BE USED AS STAND ALONE GUIDES
A thoughtful, systematic process can lead folks to a common and coordinated end-state regardless of how difficult the puzzle may seem...

However, sometimes, our systematic approach to decision making, even in what appears to be a simple process, does not lead to a common solution set...
PERSONAL BIAS AND BLIND SPOTS...

The single most destructive roadblock in our becoming an effective leader is our own personal bias...

...personal bias often results in “blind spots”
Often, blind spots result from our brain trying to cope with excessive “noise”

- Over-tasked
- Deadlines (TMT)
- Office politics
- Personal drama
- Budgets
- Legal
What are some of the consequences of personal bias and blind spots?

- Mental Entrenchment
- Egocentric perspectives
- Ethnocentric prejudice
- Closed Mindedness
- Poor relationships
- Conceit

MISPERCEPTIONS
DEALING WITH PERSONAL BIAS...

• Rarely expect or seek absolutes
• Question your own beliefs
• Ponder more, talk less…
• Ask yourself, “What am I missing?”
• Try assuming you are wrong
• Always seek alternatives…from others
• Turn off some of the noise…
Communication

- Miscommunication
  - Gestalt Theory and “how” we communicate
  - Mental Entrenchment and Capability Gaps

- Communication
  - Destructive or Effective?
  - Productive Dialogue
Miscommunication
COGNITIVE “GAPS”

The **Gestalt Theory of Mental Perception** suggests that our brains will attempt to make sense of what we see and hear to the point of imagination.

When we have less information than is required, our brains connect the available information and then fill in the gaps in an attempt to develop a coherent understanding or perception.
The Gestalt Theory also shows that how information is presented will determine our perception.

This further tells us that how we communicate information to others can affect how the message is received and understood.
HOW WE COMMUNICATE MATTERS...

• Sometimes just changing how information is presented can have a significant impact
  • Random items test

• We must be willing and able to tailor our communication

• The power of analogies and narratives
MENTAL ENTRENCHMENT

• Our brains seek to make sense of what we hear and what we see

• We rely on previous education and experience to develop understanding

• However…once our brain draws a conclusion, it is very difficult to “see” it from a different point of view

This “Mental Entrenchment” can be very damaging to effective communication
Destructive Communication...

Military Leaders
- Strategy
- Leadership
- Doctrine
- Joint Coordination
- Coalitions
- International Relations
- Partnership Capacity

Effective Communication...

Leaders Interaction:
- Debates
- Arguments
- Dialogue

FOR IN OR POST COURSE REFERENCE
MISPERCEPTIONS AFFECT COMMUNICATION

• What we hear is not always what was said
• How we communicate makes a difference
• Miscommunication is a big problem
• The “Bubble Syndrome”
• The “Vulnerability Fallacy”
I'M SORRY
I can't hear you over the sound of how awesome I am.
Be genuinely interested in what other people have to say

When someone is giving their input, do not be sidetracked by the mental development of your next comment...

The technique and psychology of paraphrasing back!

A. Weston and Carnegie
COMMUNICATING OPERATIONAL DIRECTIVES...

What expectations should we understand when communicating directives?

(Snow flake)

1. Expect that your directions will not always be followed
2. Expect that what is clear to you will not be clear to others
3. Expect that some outcomes will be unexpected
4. Expect that patience will always be required
CONSIDERATIONS FOR BETTER COMMUNICATION

- The only way to get the best of an angry argument is to avoid it
- Do not be ill tempered or mean spirited in your debate
- Be very careful telling someone they are “Wrong”
- If you are wrong, admit it quickly and emphatically
- Try honestly to see things from the other person’s point of view
- Appropriately hold others accountable for their perspectives
- Play “Devils Advocate” to challenge, not to frustrate
Tools, Ideas, and Discussion

- Developing the Environment
  - Turning this into action
  - Some Ideas…
  - Web Pages
  - Every Day Counts…
  - Questions & Comments
TURNING THIS ALL INTO ACTION

• Expand what it means to be a leader…our job is not to lead airmen, it is to lead people who happen to also be airmen…on and off duty!

• Young adults may require different leadership than older adults…take their demographic into account

• Once you have a plan for something new, go for it! Do not wait for a mandate or an official Air Force program or down-day…

• Empower your folks with this information…get others on board with your vision for enhancing human capital

• Be patient, have a long-view perspective (Trust, Loyalty, Commitment)
SOME IDEAS...

- Walk With Me
- CGO or NCO Think Tanks
- CC Call Planning
- Book Building
